

## Game specifications:

-Game title: Two players car race

-Logic: Two players car race is a game where two people can compete with each other using cars of their choice. It contains multiple levels with different difficulties (easy, medium and hard).

In the beginning, the players will have a platform where they can type their names, choose the level difficulty and the car styles.

Each level will have different path and the cars can get faster if they gain money coins. To win the race, the car must finish 3 laps of the path in less time than the other car.

There is no collision between the two cars, they can get over each other's places.

The two cars cannot get out of the path; when they collide with the border of the path, the cars stop.

The size of the cars gets smaller when the level goes from hard to easy, in the opposite the speed of the cars increases when the level goes from easy to hard.
